# About Nile Agro Industries

Nile Agro Industries is a professional company specialized in manufacturing high quality IQF fruits/vegetables, soft drinks, jams and pickles. It was incorporated in 1982 with more than 30 million USD total investments. Nile Agro Industries is considered as one of the most important and largest companies operating in the field of agricultural processing in Egypt with production capacity more than 25,000 tons per annum and more than 80 SKUs.

Nile Agro Industries has a unique location which exceeds the area of 30,000 square meters in the heart of the Delta region (Mansoura city), being considered as one of the most fertile lands with fresh harvest in Egypt. This along with our expertise and technical capabilities allow us to become pioneers of agricultural industry in Egypt.

**95% of production capacity is exported to more than 30 countries all over the world.**

As a global company we always strive to grow, through answering global consumer needs with new product development and continuous commitment to quality. As a result, Nile Agro exports about 95% of its production capacity to Gulf, Levant, MENA, Africa, Europe, Asia, Far East and America.

## Quality Comes First.

Delivery of high quality reliable products to our consumers is our core objective. Accordingly quality assurance is an integral part of our process where we have implemented ISO 22000 since 2001 and FSSC since 2019 with strict individual standards for food safety management that emphasizes on freshness of raw materials, best practices for handling ingredients and its processing.

Together with having criteria for packaging, we reach the quality that satisfies both us and our customers.

## We apply the highest technology.

Nile Agro Industries applies high hygienic standards starting from processing of the raw materials up to packaging and warehousing. We apply the highest technology to store our products in suitable environment that keeps it always fresh, healthy and traceable.

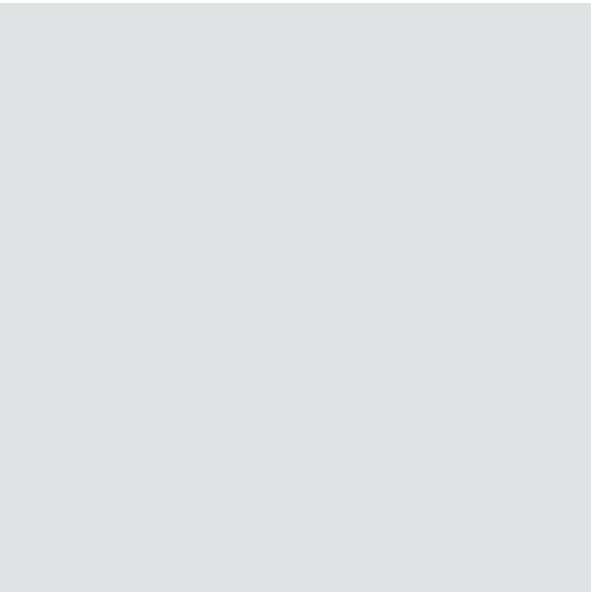

The perfect traceability systems are in use, to make it possible to map the entire production, ranging from planting and harvest to packing. We have the ability to know the cultivation history from our packed products.

Nile Agro Industries has high qualified team of sales and technicians – over 500 professionals-, who have long outstanding experience, which have brought us to a very competitive position in the international markets.

It's a top priority to serve our customers perfectly.

## Social Responsibility

Our commitment to both our community and work environment plays a fundamental role in our operations at Nile Agro Industries:

- Building Schools
- Contributing to Medical Health
- Offering Job Opportunities

## Sustainability

- Reduce Carbon Footprint
- Energy Saving
- Effluent Treatment Plant

## Vision

To be the number one brand of choice for our consumers and talent, delivering superior quality products that will impact the wellbeing of the community.

## Mission

To elevate peoples' lives via providing nourishing quality products from a sustainable environment.

# Quality

Delivery of high quality reliable products to our consumers is our core objective. Accordingly quality assurance is an integral part of our process where we have implemented FSSC since 2019, with strict individual standards for food safety management that emphasizes on freshness of raw materials, best practices for handling ingredients and its processing.

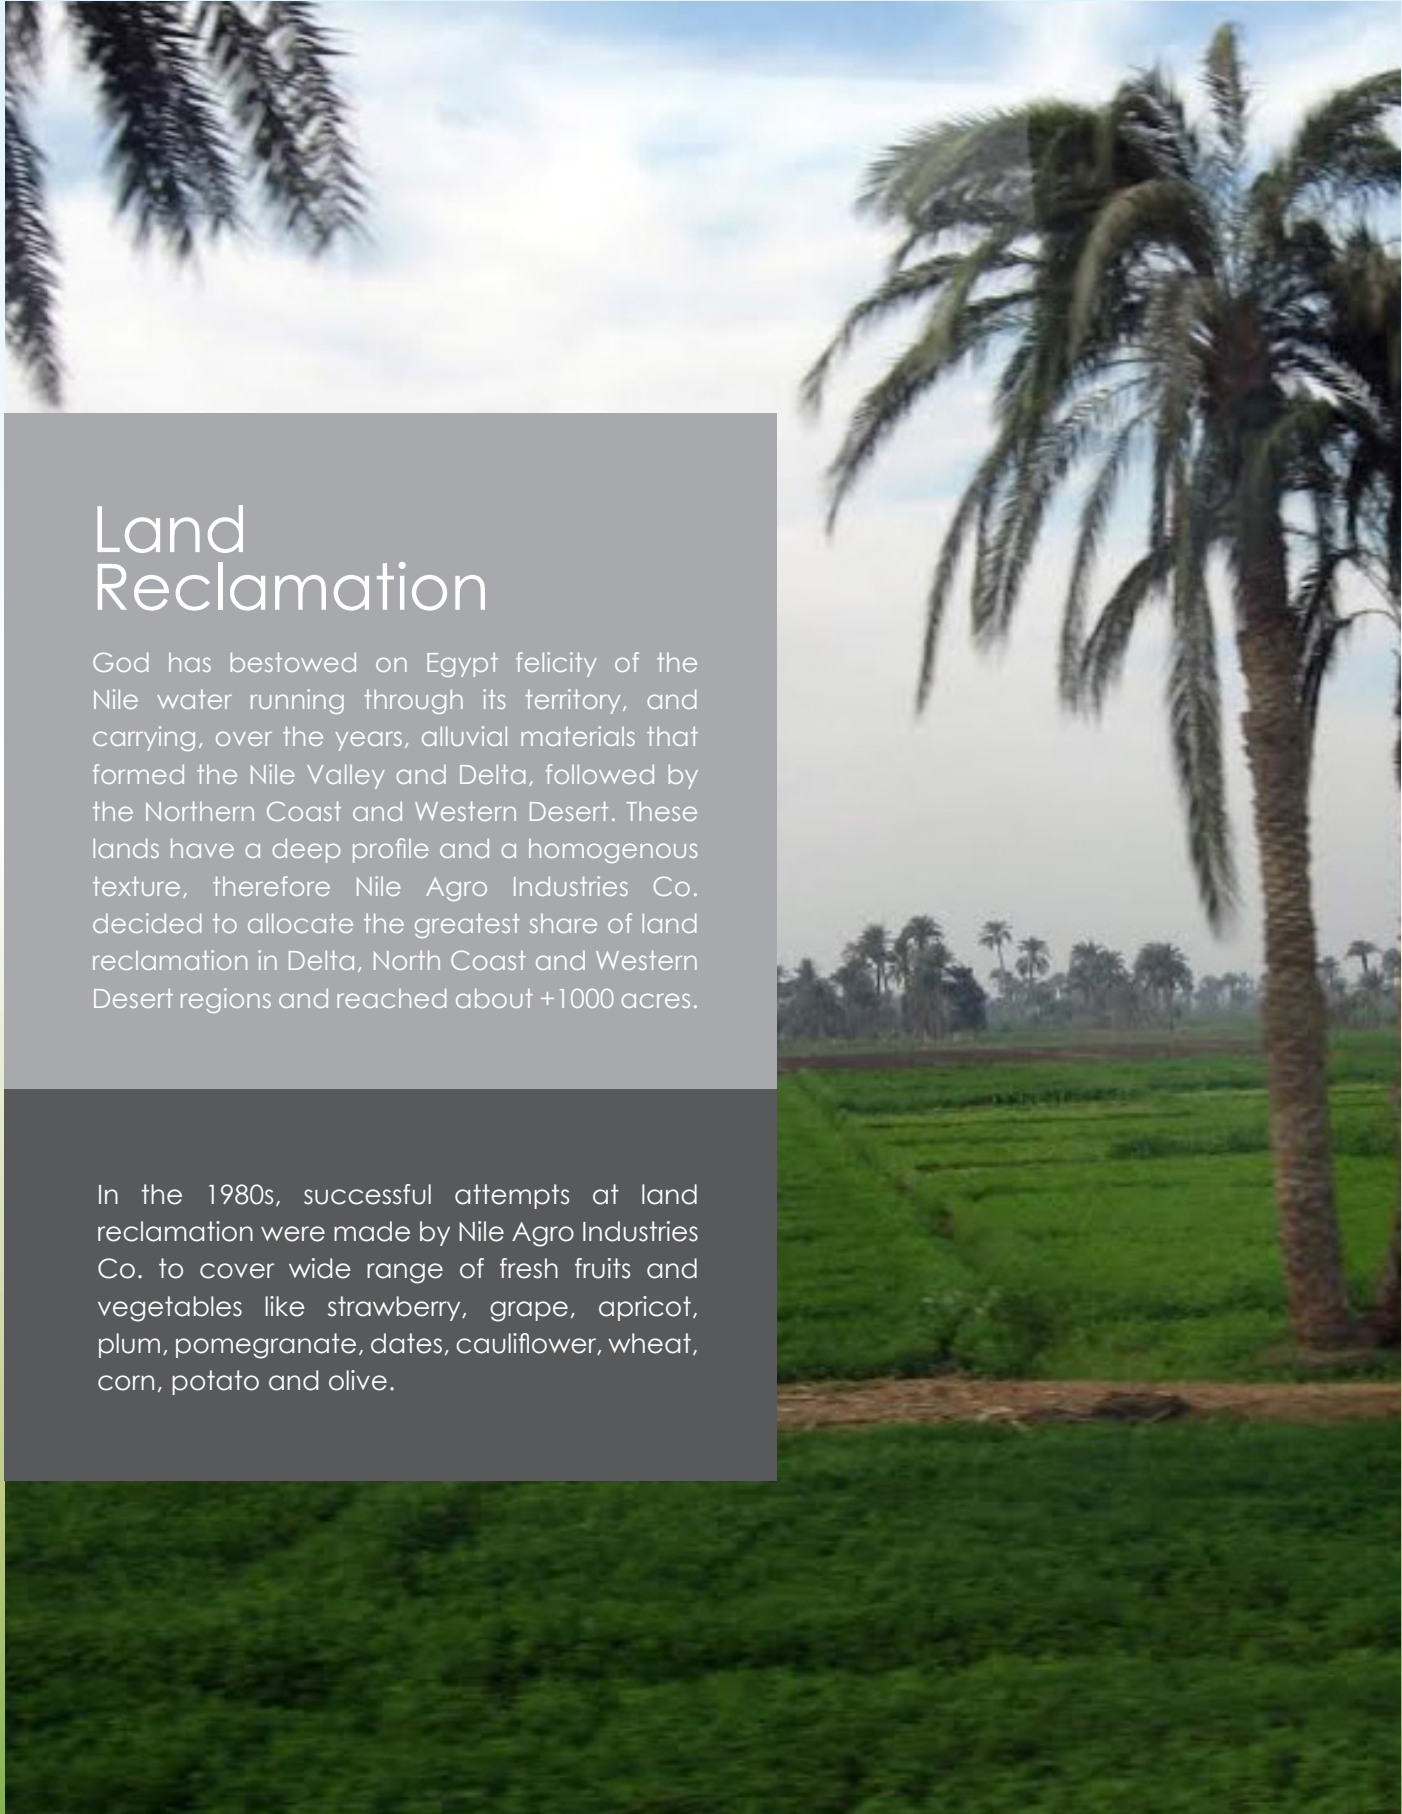

Together with having criteria for packaging, we reach the quality that satisfies both us and our customers.

# Traceability

The perfect traceability systems are in use, to make it possible to map the entire production, ranging from planting and harvest to packing. We have the ability to know the cultivation history from our packed products.

# Land Reclamation

God has bestowed on Egypt felicity of the Nile water running through its territory, and carrying, over the years, alluvial materials that formed the Nile Valley and Delta, followed by the Northern Coast and Western Desert. These lands have a deep profile and a homogenous texture, therefore Nile Agro Industries Co. decided to allocate the greatest share of land reclamation in Delta, North Coast and Western Desert regions and reached about +1000 acres.

In the 1980s, successful attempts at land reclamation were made by Nile Agro Industries Co. to cover wide range of fresh fruits and vegetables like strawberry, grape, apricot, plum, pomegranate, dates, cauliflower, wheat, corn, potato and olive.

# Processed Food Products

## » IQF Fruits & Vegetables

Artichoke
